

Sked® Basic Foam Flotation System Inflatable Flotation System

Product Description SK-600-OR SK-600-B

This flotation system maintains the Sked® in a nearly vertical position in the water. It is self-righting and keeps the patient's head completely out of water, even in rough seas. The side floats and chest pad provide buoyancy sufficient to support two rescuers in the water in addition to the patient, while the lead shot filled ballast keeps the foot end down and the head elevated out of the water. It will provide approximately 80 lbs of flotation. The system is available in a variety of configurations, including an option with CO2 inflatable side float logs and an empty ballast bag with hook and loop closure which can be filled with rocks just prior to use.

The SK-600 Basic Foam Flotation System comes with:

- SK-601 Ballast Weight
- SK-602 Inflatable Chest Pad
- SK-603 Ethafoam Floats (pair)
- SK-604 Extra Long Handles
- SK-209 Retaining Strap

The SK-600-B inflatable flotation system maintains the Sked® in a nearly vertical position in the water.

The SK-600-B Inflatable Flotation System comes with:

- SK-602 Inflatable Chest Pad
- SK-605/SK-606 CO2 Inflatable Float 5" Diameter Logs (pair)
- SK-653 CO2 CARTRIDGE - 38g (pair)
- SK-604 Extra Long Handles
- SK-607 Ballast Bag (3.6 lbs)
