

DMM VAULT LOCK TOOL CARRIER

The Vault is a secure and durable tool holder that can be used on everything from harnesses and kit bags to vehicles. The two-part aluminum alloy Vault is secured using a stainless steel bolt and is the ideal solution for gear storage, organization and transportation. Safe, strong, and secure for racking tools or lanyards, the Vault's locking gate can be set to either a locked or unlocked position, and the low profile mechanism does not affect fast clipping. *Not PPE.*

- One-handed operation for ease of use
- Top 'shelf' allows in-situ gear selection
- Low nose profile minimizes hook-ups
- Can be set to either the unlocked or locked position
- Max webbing size: 45 x 3 mm
- Gate opening: 20 mm
- User-installed with flat-bladed screwdriver
