

ROPE BAGS, BLACK

CMC's popular Rope Bags have a variety of innovative features. All bags are made of the same tough 1000 denier Cordura nylon that has made CMC Rope Bags such solid performers for years. Handles, just inside the top, hold the bag open for efficient stuffing or can be used to carry the bag from the top. The bottom of the bag has a grommet to pass the rope through plus a carabiner loop if you prefer to tie the end off inside the bag. The #2 and #3 bags have molded backpack style shoulder straps that provide greater comfort when carrying a heavy bag and a soft rubber carrying handle that is gentle on the hand when lifting or carrying the bag. Tops on the bigger bags feature rugged pack cloth that closes easier when you pull the drawstring.
