

LITTER SHIELD

Trusted and proven from years in the field, our Litter Shield attaches to a mount on the litter rail that allows the shield to quickly pivot and nest inside the litter for transporting and storing. A quick-release pin allows the shield to be completely removed when necessary. This lower-profile version makes storage easier, but does not provide as much clearance for the patient's face as the Litter Shield Plus, see below. Each Litter Shield requires a railing clamp.

Replacement parts for Litter Shields are available through the website or by contacting Customer Support.

Option	Litter Shield
Item	740000
